

## **New Vendor Registration System**

“DLW is having a system of registration / approval of vendors system for production related item as per RDSO/ Design Department of DLW, for which details are available at respective website.

Similarly for Tooling items registration system is as coordinated by CME/Plant. Registration of medical items is done by CMD/DLW. Most of the other general items are DGS&D based items or controlled by other central agencies, by Railway Board etc.

Since, already majority of the items required by DLW are dealt by elaborate approval systems as above, no further separate registration of firms shall be done by Stores department.

However, in case an item other than the above needs to be procured, than any firm registered by any other of Railway shall be considered as registered supplier for that item. In such cases firms shall be required to submit a valid registration of those zonal railways for that item and latest 3 years' performance for that item along with the offer. Alternatively open tenders would be resorted with suitable eligibility criteria.”
